

X SHORE 1

BASE BOAT SPECIFICATIONS

X Shore 1

A true front-runner setting a new standard for your boating experience. Silent, powerful and with zero emission.

The X Shore 1 is an extension of the Eelex 8000 clean, minimalistic, Scandinavian design identity that naturally blends in with nature.

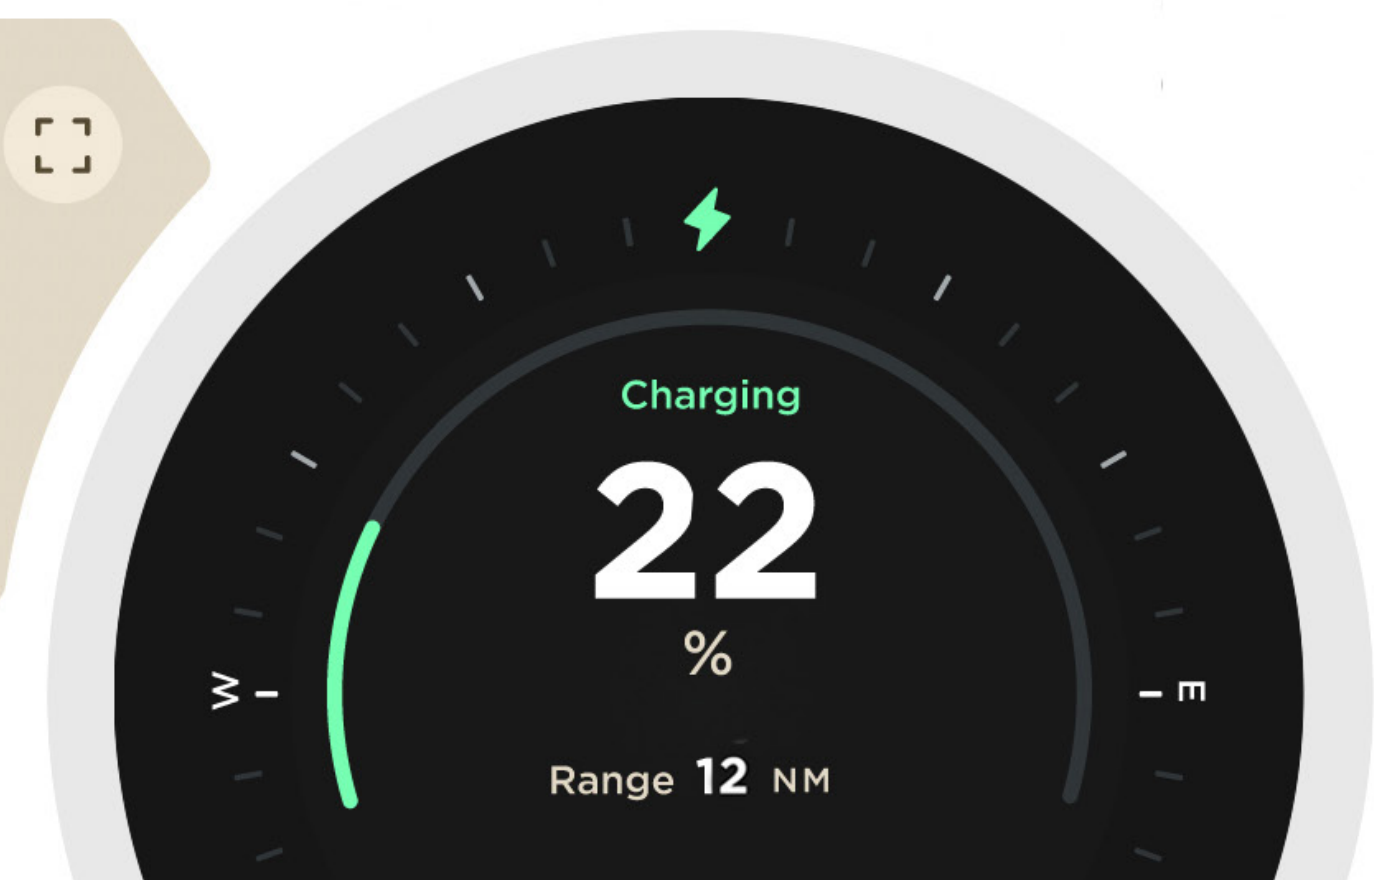

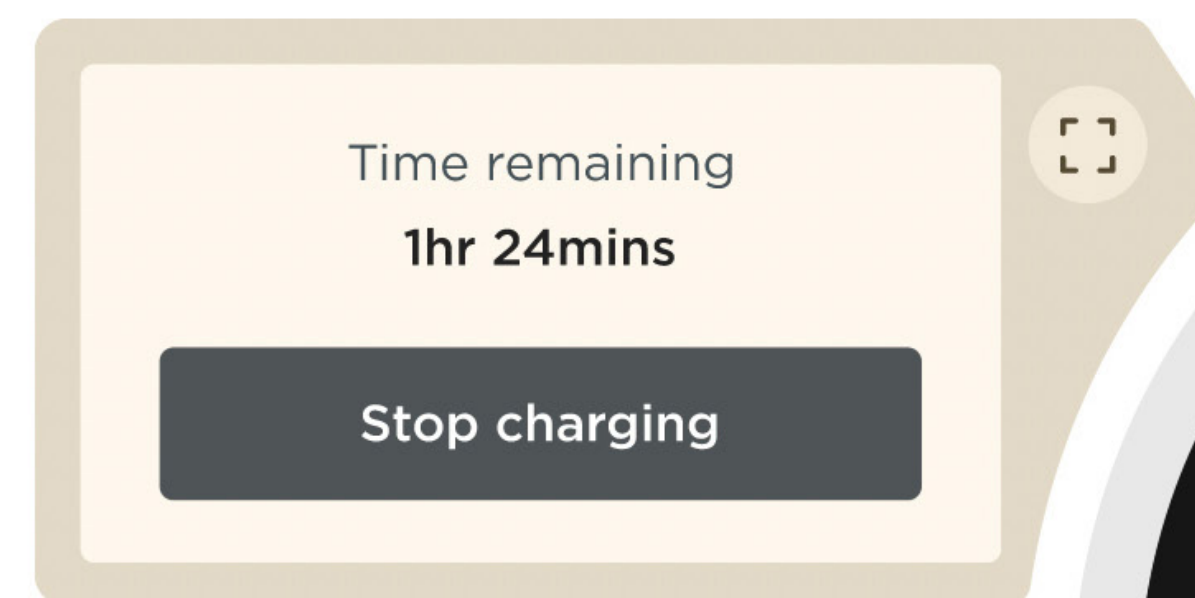

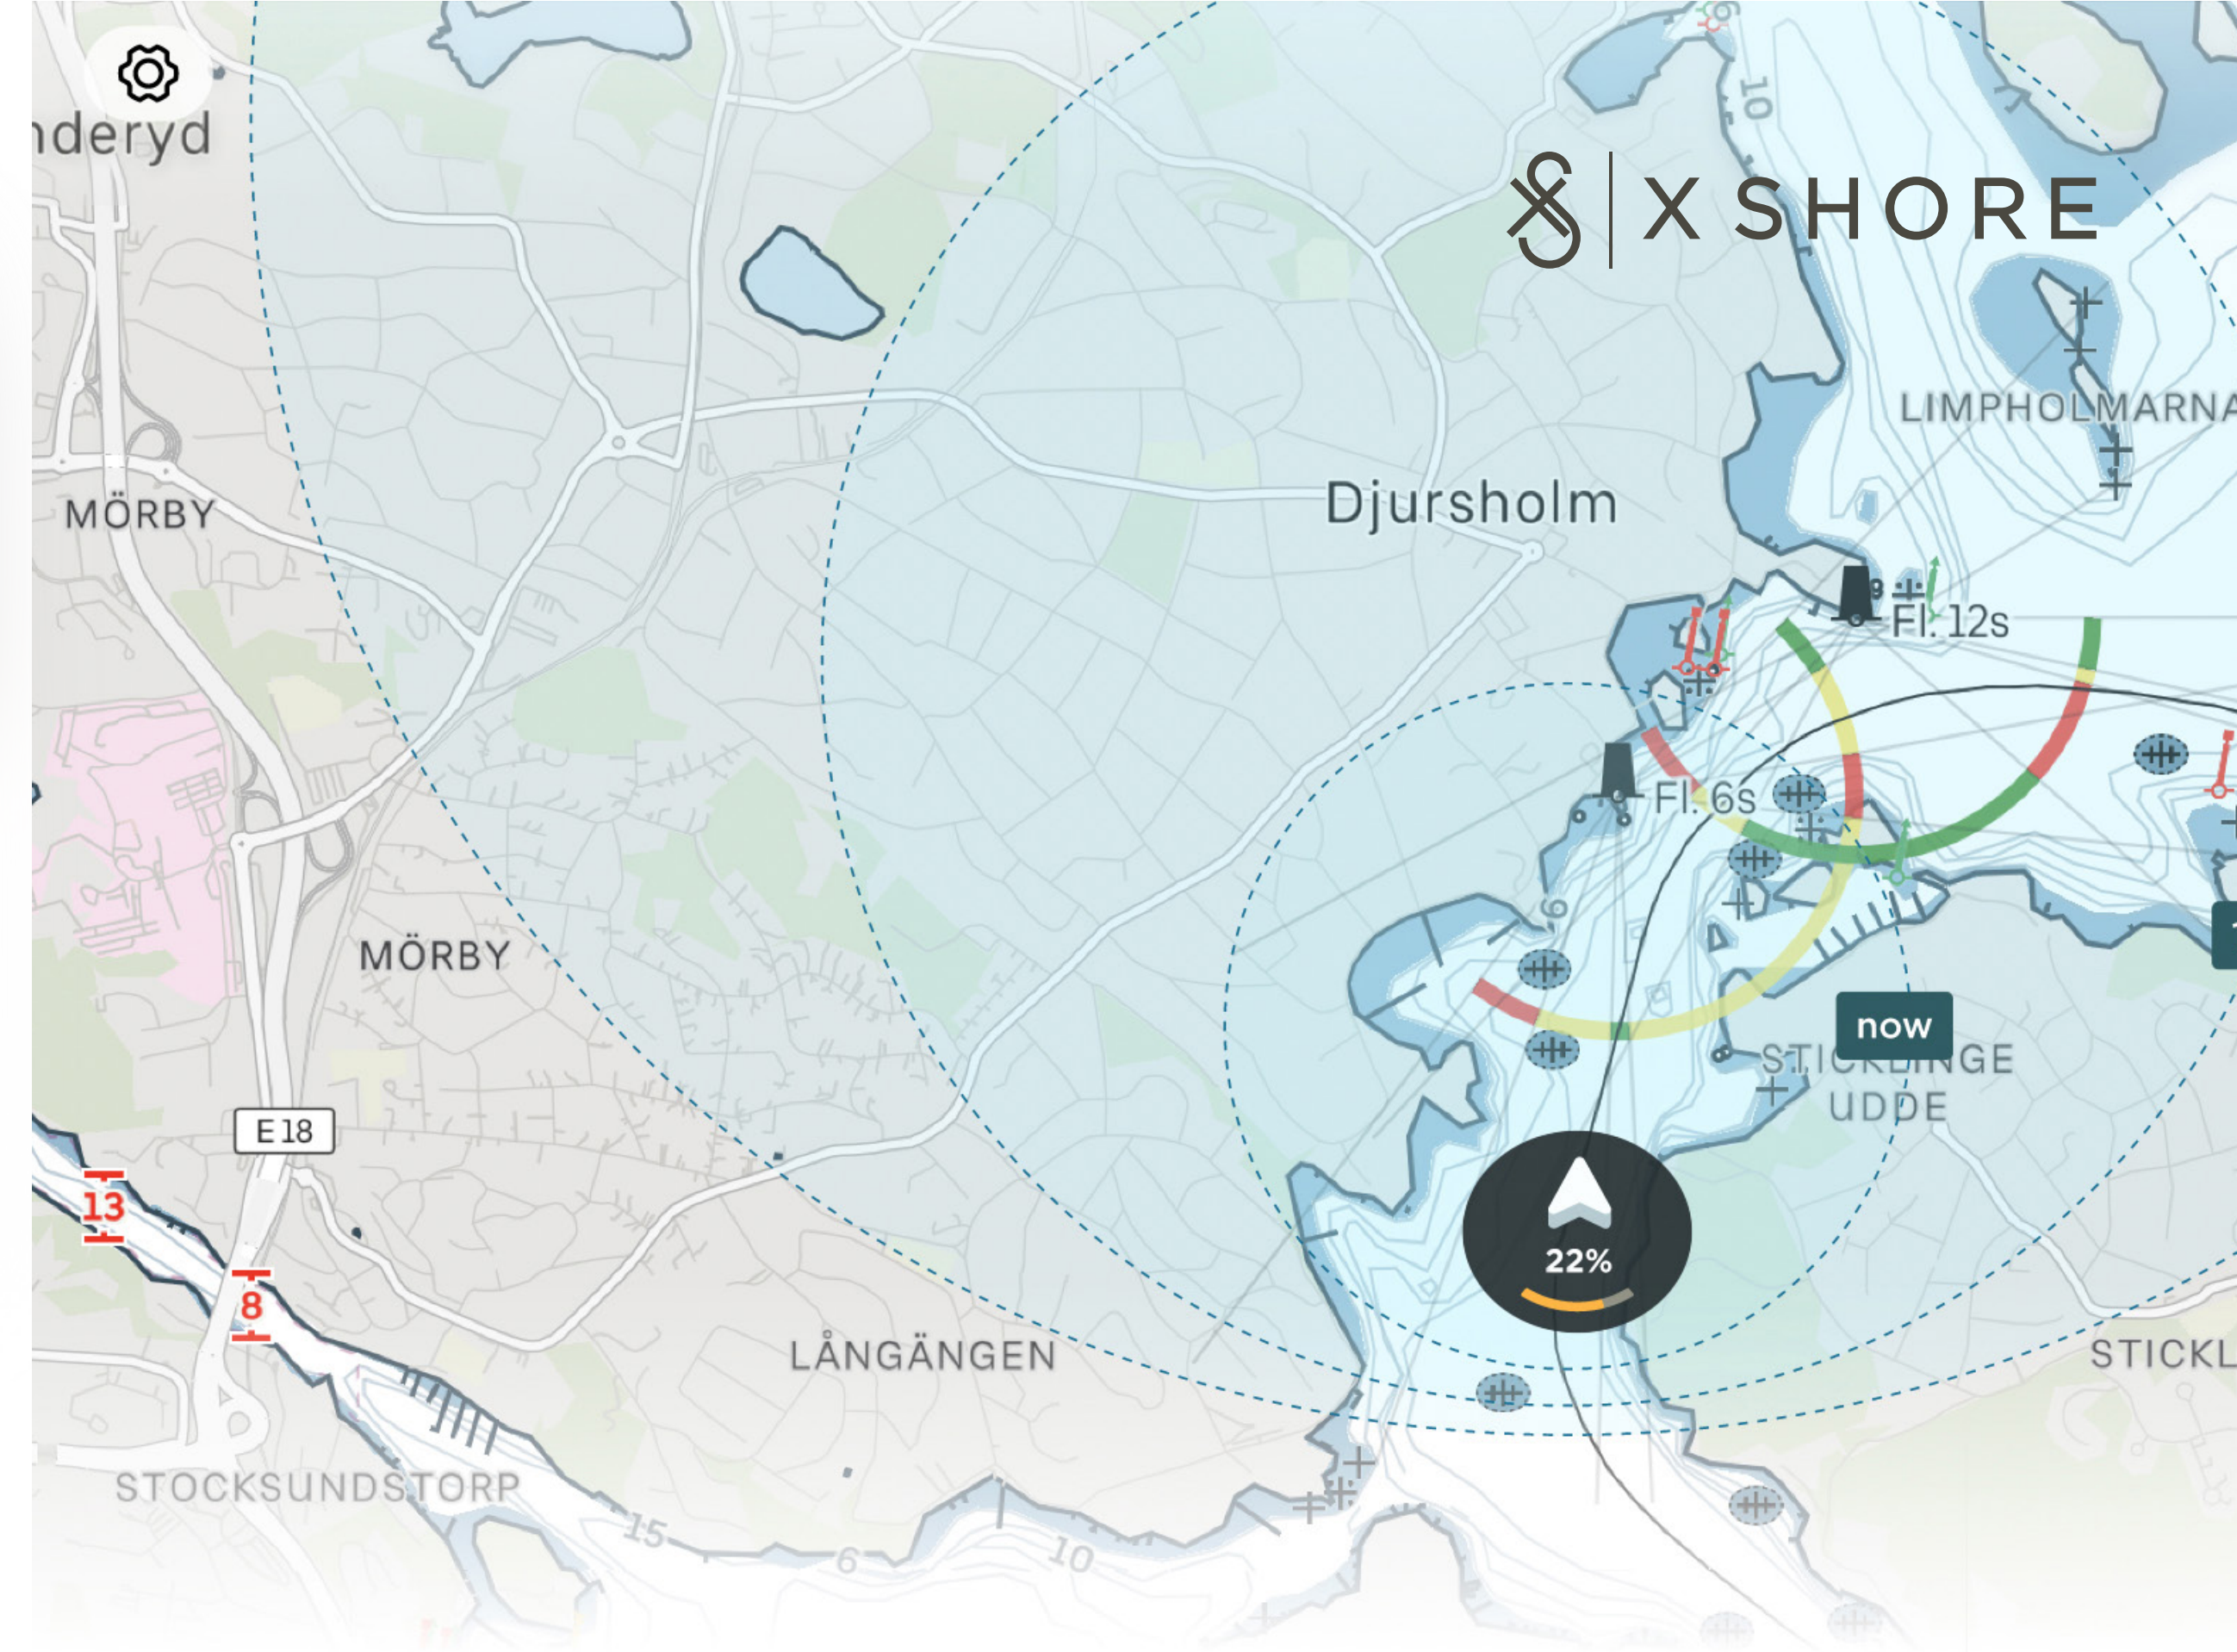

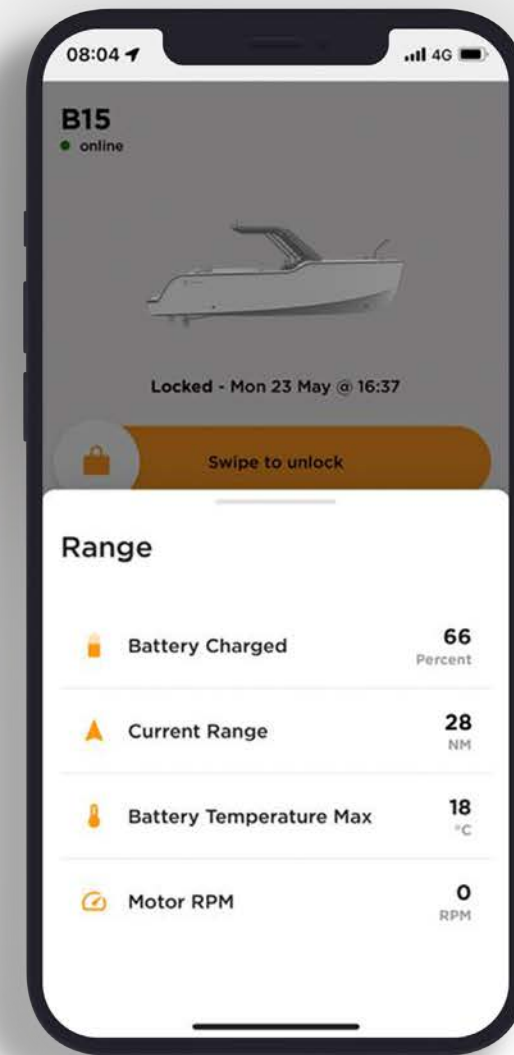

Measuring 6.5 meters, its spacious interior and forward cabin allows for both social and active day adventures as well as comfortable overnight stays.

Smart boating

The X Shore 1 brings all the technology from the Eelex 8000, such as range estimate, route planning and man overboard safety feature, into a smaller sized boat available to a broader market that can't necessarily fit a 26 foot boat into their life. Also, our highly appreciated and intuitive interface has massively improved to excel your boating experience.

- **App.** Much of the technology is connected to and handled by the X Shore app which also acts as a remote key.
- **Anti theft.** Always know your boat's exact location with the app that also lets you activate a geofence with alerts if your boat ever crosses it.
- **Infotainment system.** From the helm the driver and passengers can manage the X Shore infotainment system, including sound and lighting, energy and route planning, weather and notifications center. Everything is managed from a large touchscreen with software designed by X Shore.

Charging

The X Shore 1 has a 63 kWh battery pack. Waterproof and highly resistant, with working temperature range from -25°C to $+45^{\circ}\text{C}$.

Normal charging

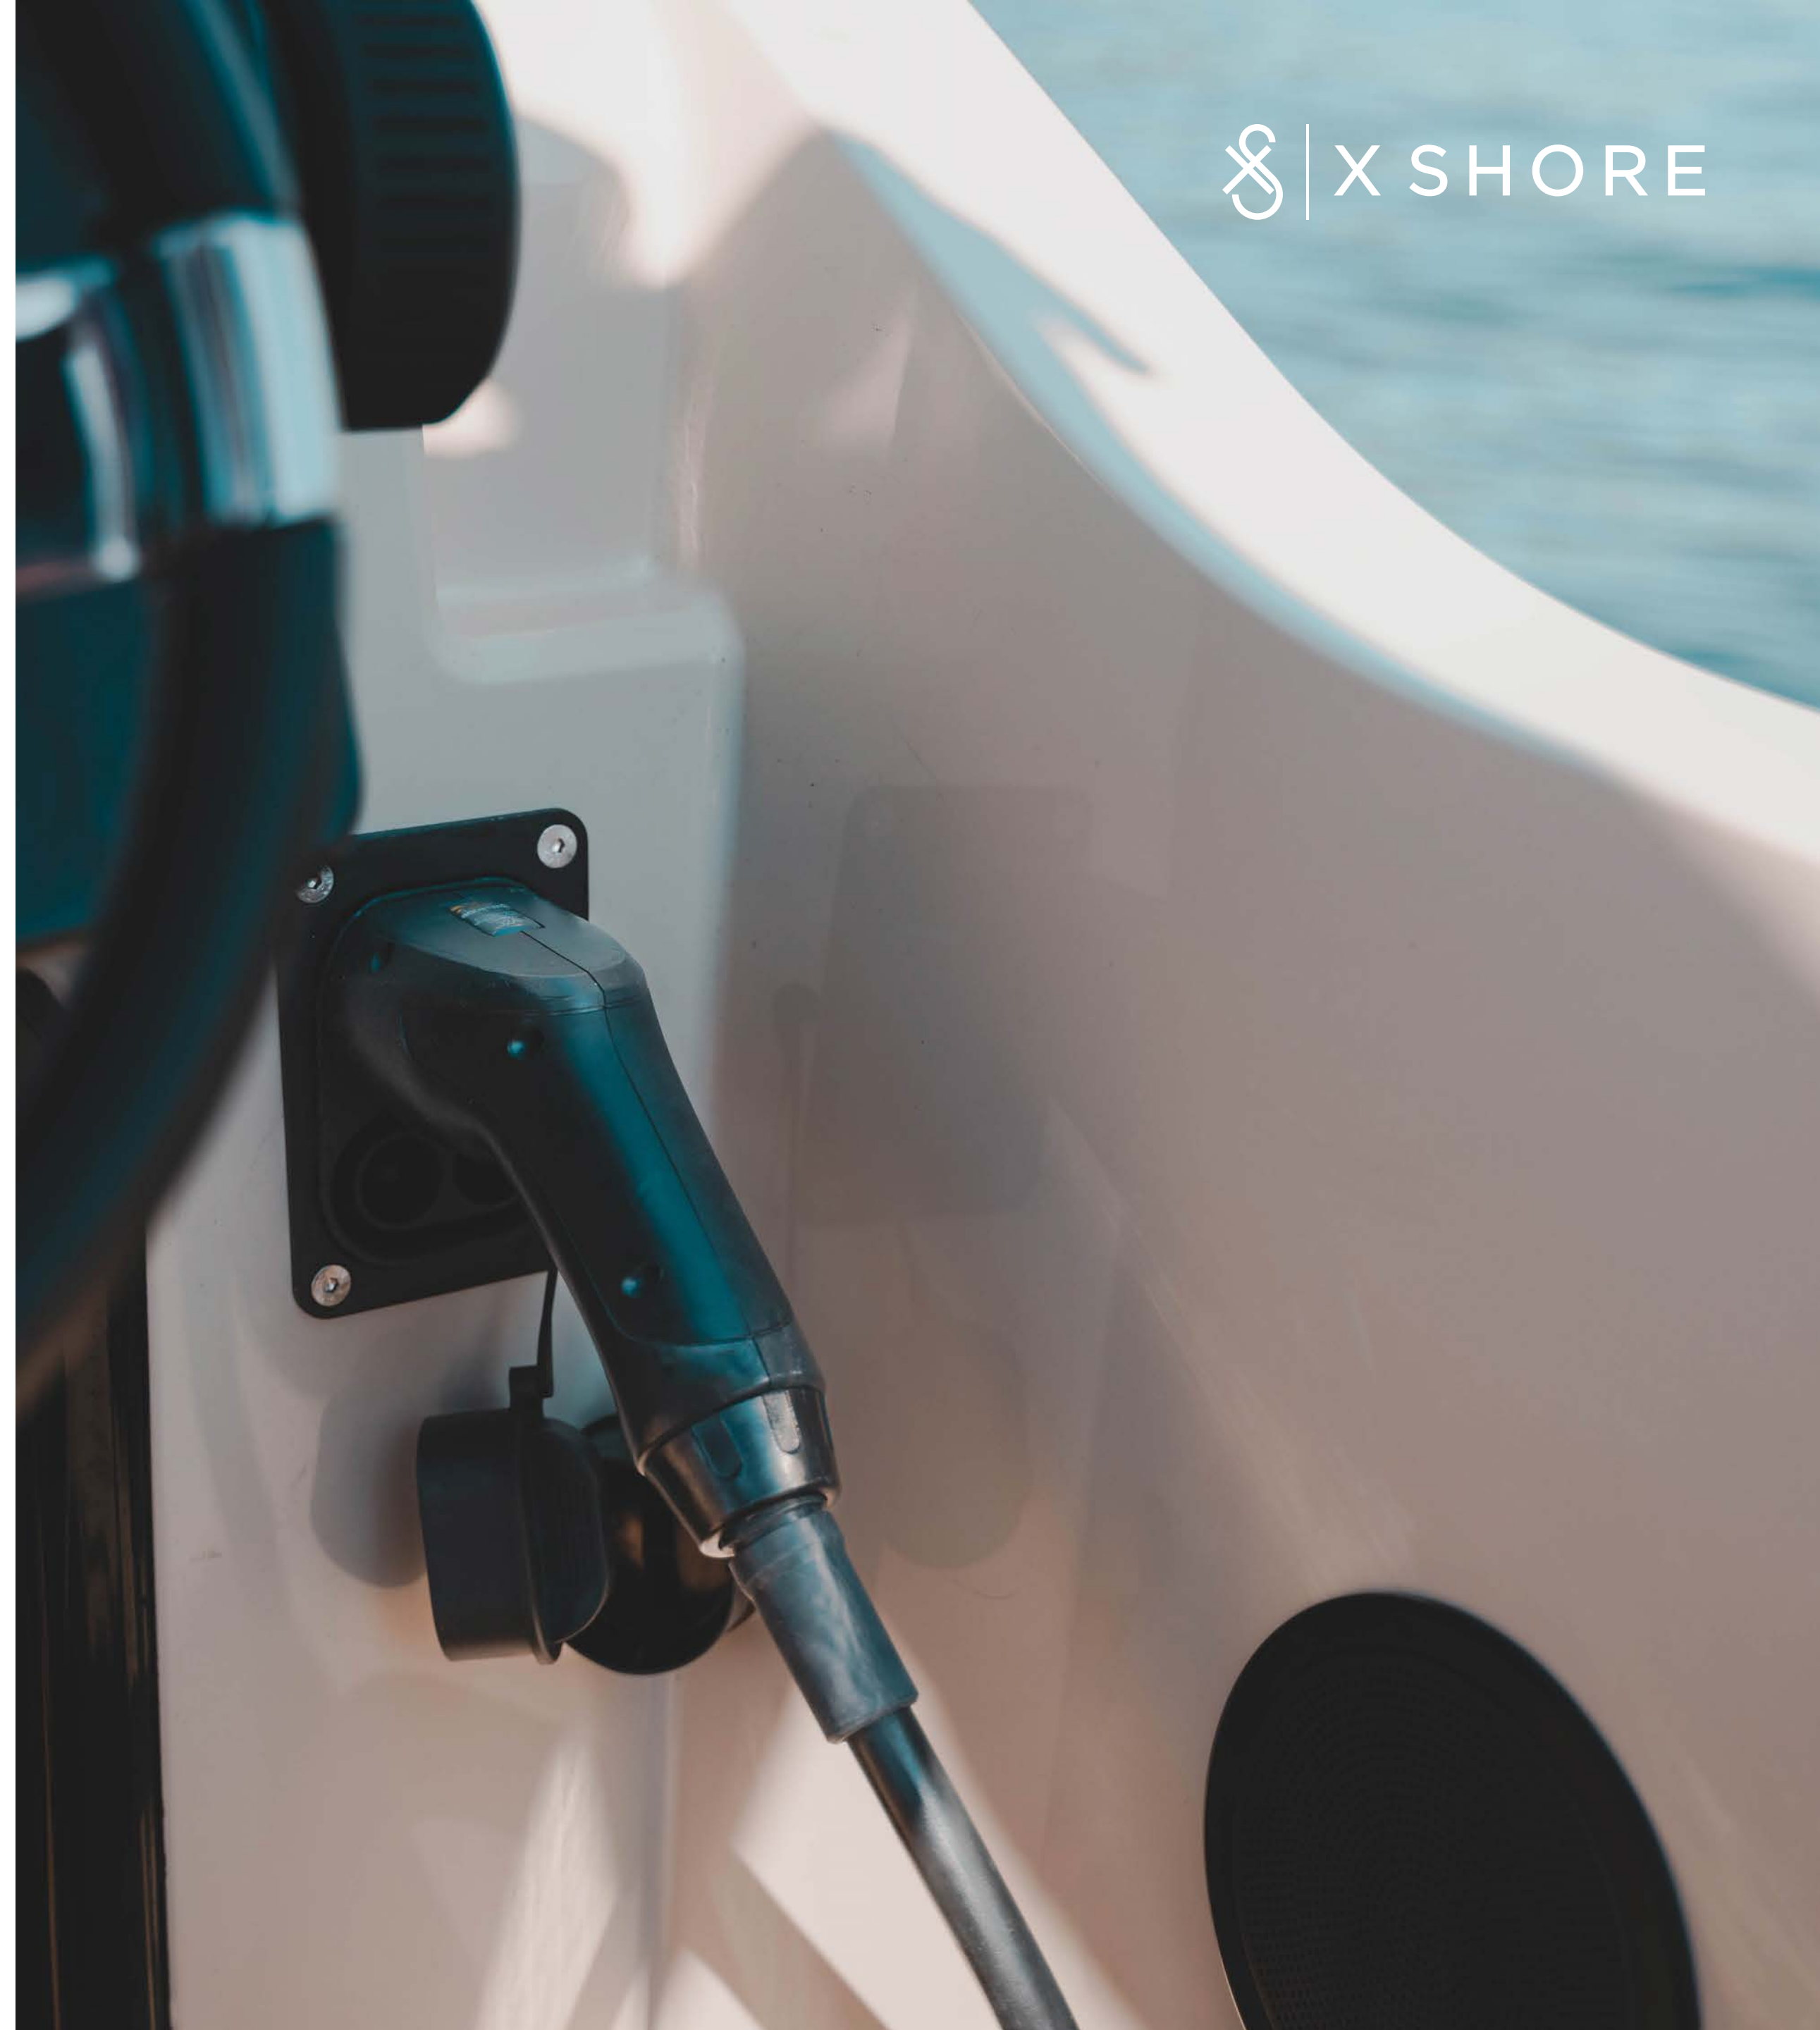

- 22 kW: 1.5 hours 20-80%
- 7.3 kW: 4.6 hours 20-80%

Fast charging

- 45 kW: 50 min 20-80%

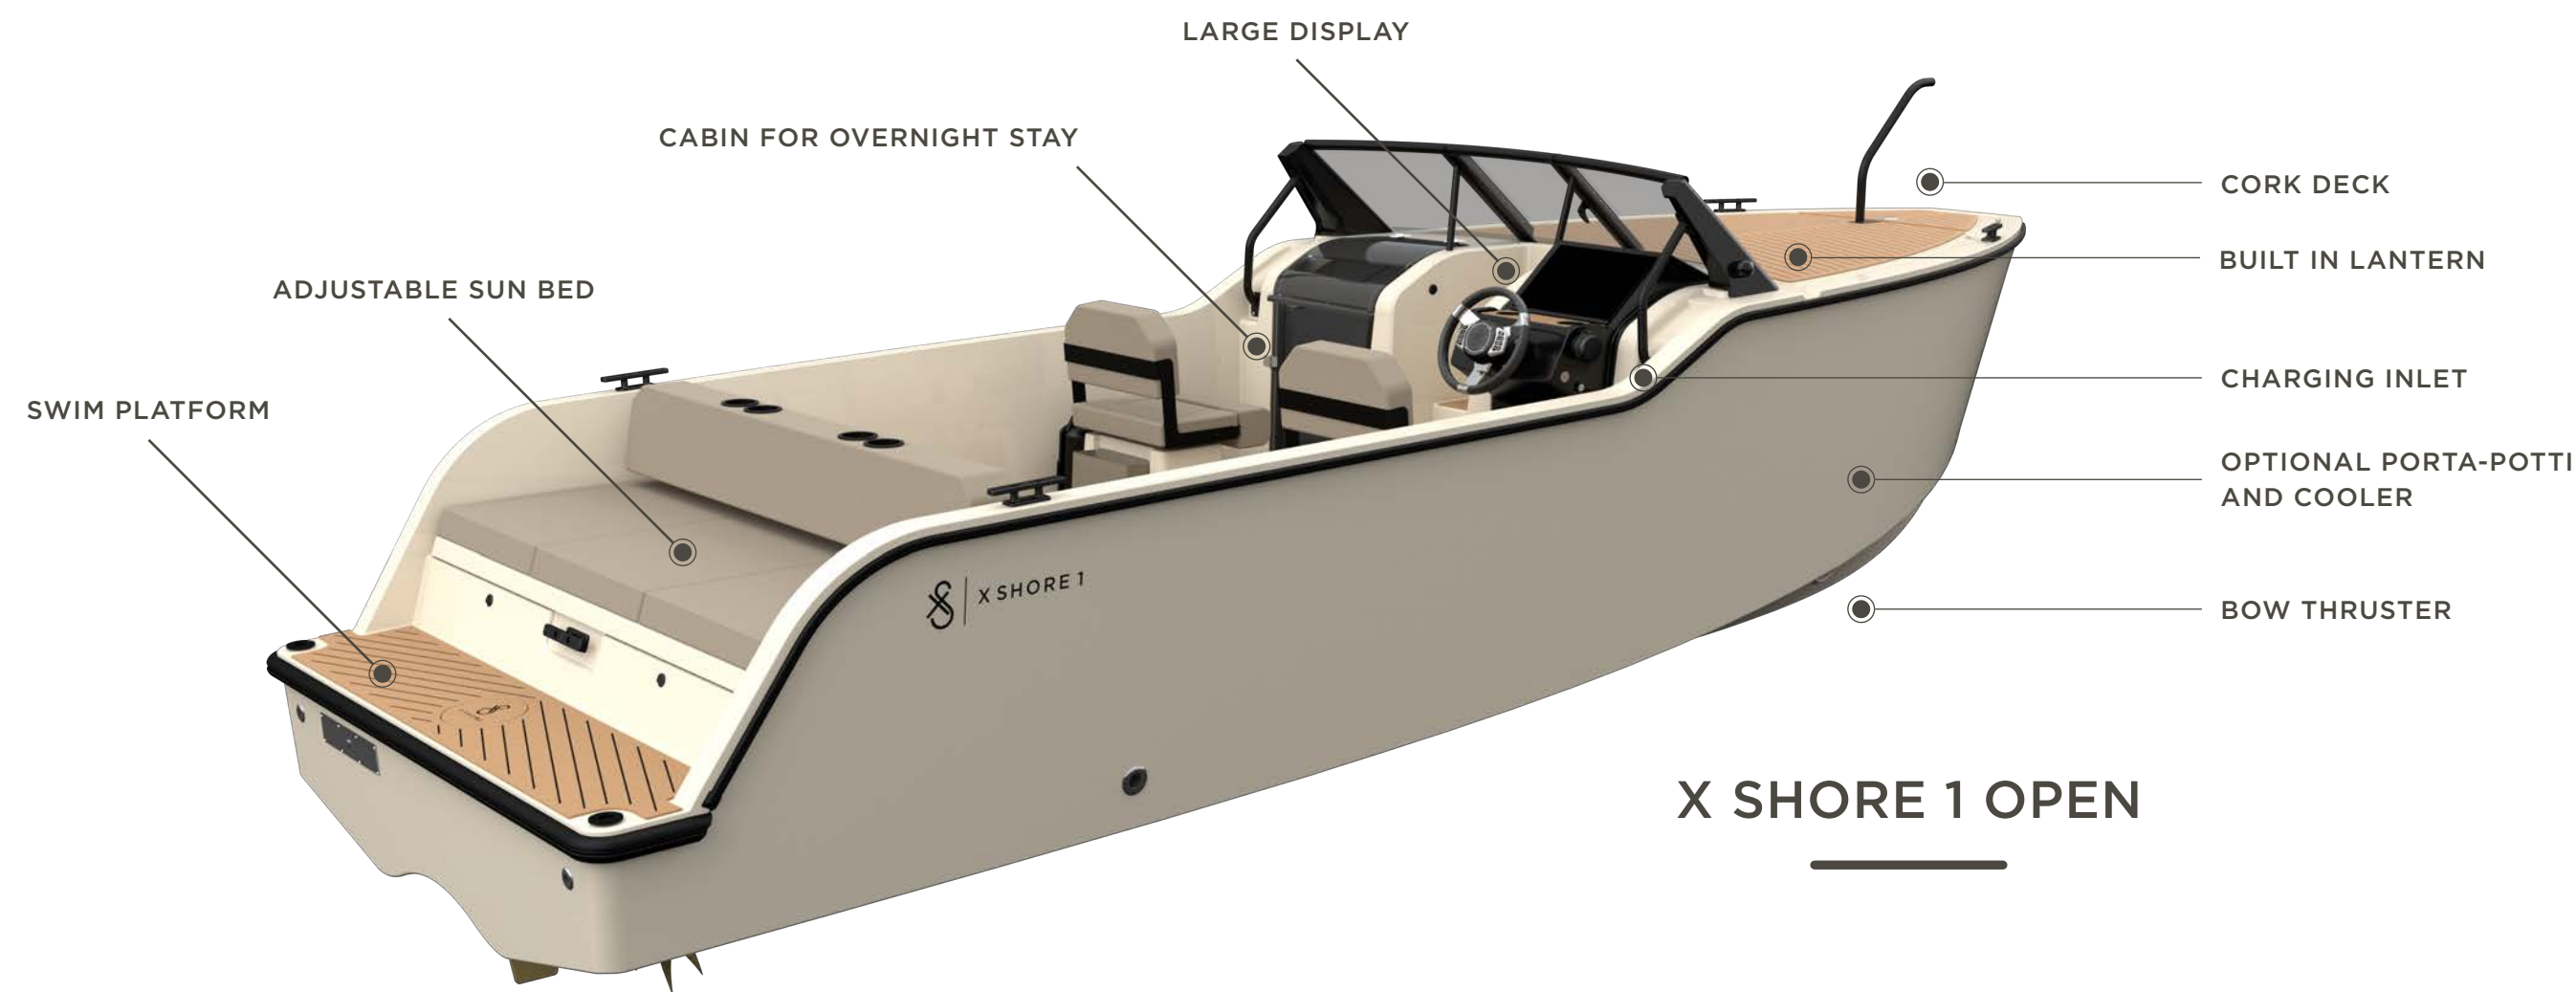

Range

- 50 NM at lower speeds.

Specifications

- 100% electric
- Modular interior
- Top or Open model
- 50 NM range at lower speed

Fast Charging	20-80% 50 min (45 kW)
Display	Large touch screen
Available Colors	

Forward cabin

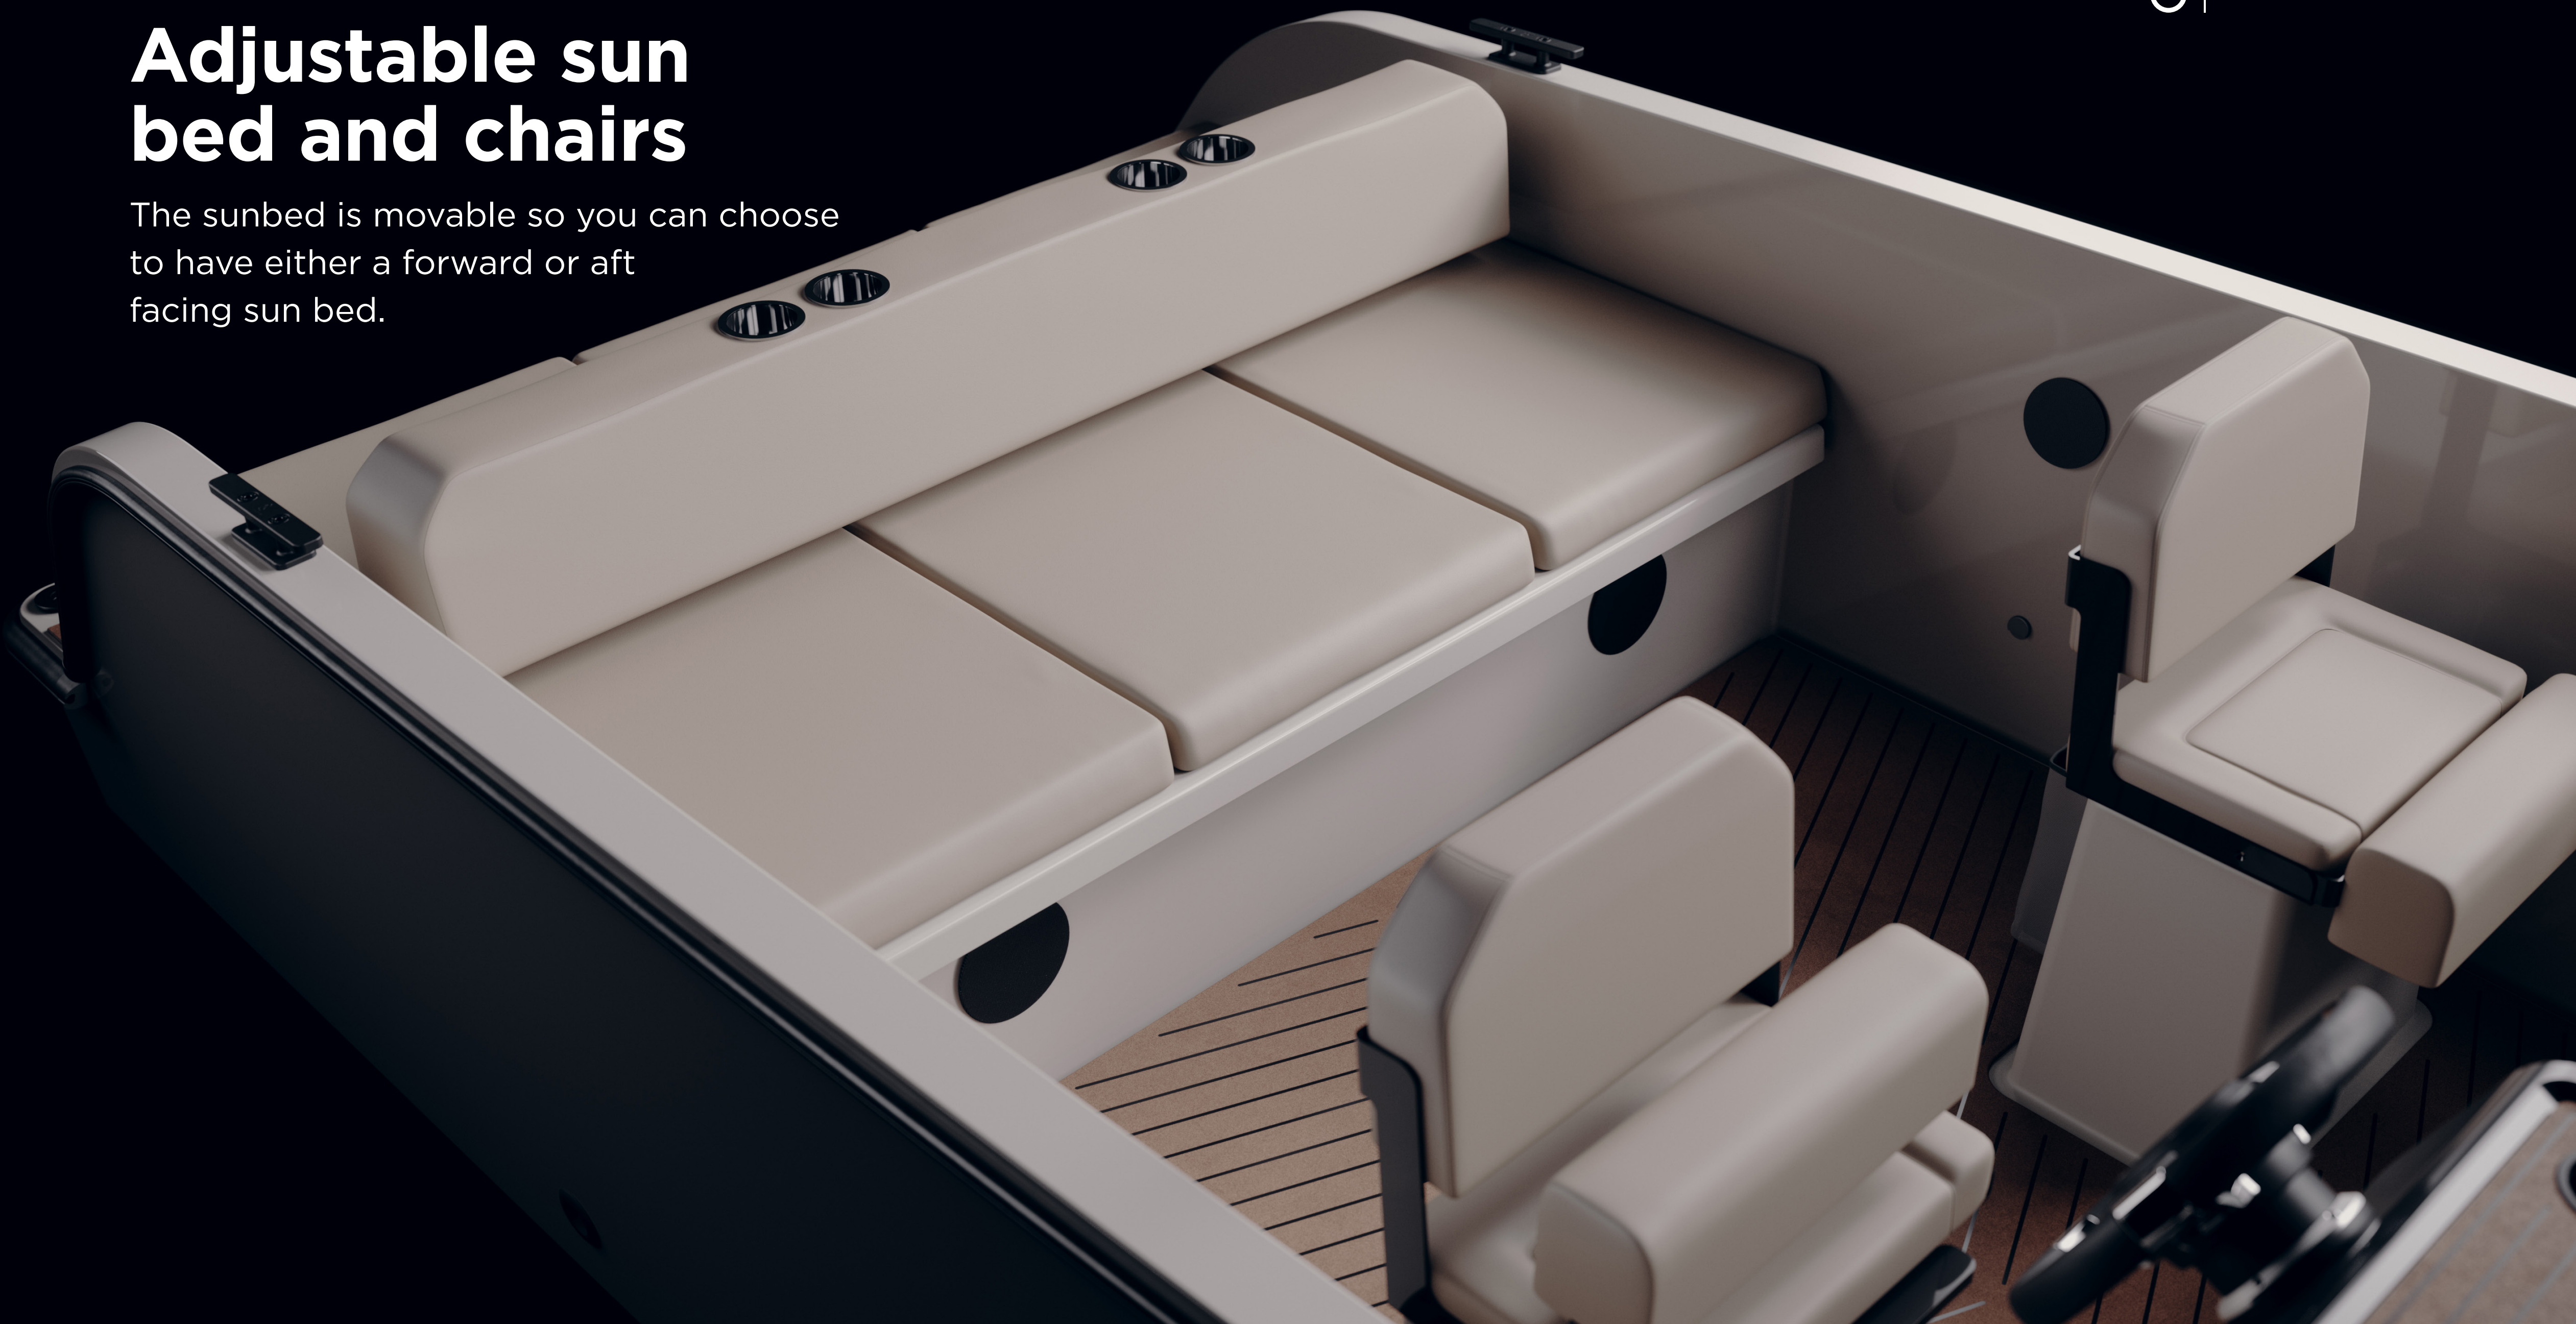

The cabin has room for a family of four to sleep, but also offers ample storage.

Dedicated space for cooler and porta potty has been set aside to maximize usability and accessibility for those that desire this functionality.

Adjustable sun bed and chairs

The sunbed is movable so you can choose to have either a forward or aft facing sun bed.

Social space

The raised freeboard in the forward area has allowed us to offer a generous forward cabin. And as the freeboard steps down just aft of the A pillar it serves as seating for the social midship area of the boat.

Ready for production — Shore Industries 1

The X Shore 1 will be built at X Shore Industries 1 in Nyköping, Sweden. Here the hulls will be produced via prepreg. As a result, the boats are lighter and only require a single 63 kWh battery.
